EARTH DAY CELEBRATION IN WEST OAKLAND

Coming Together with Research & Data: Presenting Information from Real-Time Equipment

WHEN

SATURDAY

APRIL 21ST, 2018

10:00AM-4:00PM

**COME CELEBRATE EARTH DAY WITH US
AND LEARN ABOUT AIR POLLUTION
FINDINGS IN WEST OAKLAND!**

WHERE

LINCOLN CHILD

CENTER

1266 14TH ST

OAKLAND, CA 94607

This Earth Day, make an impact with us!

Join us [on Saturday, April 21st](#) to learn about all the data that has been collected in West Oakland to understand air pollution in our neighborhoods.

We will share findings from a recent study where we partnered with Google to detect air pollution block by block in West Oakland neighborhoods. At the workshop, you will also learn about preliminary data from the 100x100 sensors network, which, with help from our neighbors, gives us a picture of how black carbon –the main component of soot emitted from diesel engines, wood smoke, and other sources– varies in time and space. But, this is just the beginning! [We want to hear from you](#) and how you think these data can help improve air quality in West Oakland.

Why attend

As many of you already know, the City and the Port of Oakland have initiated a [new Truck Management Plan for West Oakland](#). As part of the process, the community is invited to provide input on what we care about and what we are concerned about when it comes to trucks in our neighborhoods.

During this workshop, we will work together to determine how these data and our local knowledge can inform the City and the Port of Oakland to produce a truly comprehensive plan that minimizes air pollution in our neighborhoods. Here, we will set priorities and recommend ways to ensure that this plan is an opportunity to ensure that air pollution does not persist in the places that matter most: where we live, work, play, and pray. Join us in making an impact!
